

Port Pharmacy is committed to helping save lives.

Accidental Opioid Overdose is more common than you think.

1,000

people are treated each day in
Emergency Rooms for not
using opioids as directed

What are Opioids?

Prescription opioids can be prescribed by doctors to treat moderate to severe pain, but can also have serious risks and side effects.

Common types are oxycodone (OxyContin), hydrocodone (Vicodin), morphine, and methadone.

100

people die from drug overdose
in the U.S. each day.

Ask us today about our Triple R Program

If you or someone in your household has been prescribed an opioid pain medication, you can't afford not to be prepared in case of emergency.

>6,000

children 0-5 years of age
experience accidental opioid
exposure each year.

The State of PA allows any patient or caregiver to obtain **naloxone**, a drug to **reverse** the effects of an opioid overdose, without a prescription, simply by asking for it at our pharmacy.
